

Extruded Anodized Aluminum Enclosure Housing Heat Resistance Custom

Our Product Introduction

for more products please visit us on alu-heatsink.com

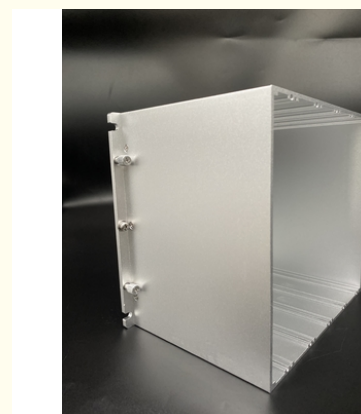

Basic Information

- Place of Origin: China,Guangdong
- Brand Name: No Brand
- Delivery Time: 15-20 Workdays
- Payment Terms: L/C, T/T, Western Union, MoneyGram

Product Specification

- Type: Power Station
- Shockproof: Yes
- Maintenance: Low
- Durability: High
- Waterproof: Yes
- Compatibility: Universal
- Heat Resistance: Good
- Material: Aluminum
- Highlight: Custom Aluminum Enclosure,
anodized Aluminum Enclosure,
Anodized extruded aluminum housing

Product Description

Product Description:

The enclosure is made from high-quality anodized aluminum, which not only gives it a sleek and modern look but also makes it durable and long-lasting. Anodized aluminum is known for its corrosion-resistant properties, ensuring that your enclosure will remain in top condition for years to come.

One of the key features of this enclosure is its customizable size. We understand that every power station is different, and that's why we offer a range of sizes to choose from. Whether you need a small enclosure to house a single battery, or a larger one to accommodate multiple batteries, we have you covered.

In addition to its sleek design and customizable size, this enclosure also requires low maintenance. Thanks to its anodized aluminum construction, it is resistant to scratches and dents, making it easy to keep clean and looking like new.

Overall, our Aluminum Enclosure is the perfect choice for anyone looking for a high-quality, durable, and customizable power station enclosure. Its anodized aluminum construction, easy installation, sleek design, and low maintenance make it a standout choice for anyone in need of a power station enclosure.

Features:

Product Name: Aluminum Enclosure

Maintenance: Low

Waterproof: Yes

Type: Power Station

Size: Customizable

Durability: High

Shape: Square

Finish: Anodized

Material: Anodized Aluminum

Technical Parameters:

Type	Power Station
Size	Customizable
Design	Sleek
Waterproof	Yes
Installation	Easy
Color	Silver
Corrosion Resistance	Excellent
Maintenance	Low
Material	Aluminum
Compatibility	Universal

This Aluminum Enclosure is a square-shaped battery container that is waterproof, easy to install, and has low maintenance. It comes in a sleek silver design and is made of excellent corrosion resistant material. It is also compatible with universal devices.

Applications:

Electronic Devices: These enclosures are perfect for electronic devices, especially ones that require high durability and shockproof features. The anodized aluminum body ensures that the device is well-protected from any external damage, making it ideal for rugged environments.

Industrial Automation: Anodized Aluminum Enclosures are widely used in industrial automation. They are durable and can withstand harsh conditions, making them suitable for use in factories and other industrial settings. They are also resistant to heat and corrosion, which ensures optimum protection for the equipment they house.

Audio/Visual Equipment: These enclosures are also suitable for audio/visual equipment. They are lightweight, easy to install, and have excellent heat resistance, making them ideal for use in home theaters and other entertainment systems.

Medical Devices: Anodized Aluminum Enclosures are also suitable for use in medical devices. They are durable, shockproof, and compatible with a wide range of devices. They can also withstand exposure to chemicals and other harsh substances, making them ideal for use in hospitals and other medical settings.

Outdoor Equipment: These enclosures are also ideal for use in outdoor equipment. They are resistant to corrosion and have good heat resistance, making them perfect for use in outdoor settings where the devices are exposed to the elements.

The No Brand Anodized Aluminum Enclosures are made in Guangdong, China, and have a delivery time of 15-20 workdays. These enclosures are shockproof and compatible with a wide range of devices, making them highly versatile. They are also highly durable, with excellent heat and corrosion resistance, which ensures long-lasting protection for the equipment they house.

Customization:

Our Aluminum Enclosure product customization services offer a sleek and durable design for your power station needs. Made with high-quality aluminum material, this enclosure provides excellent corrosion resistance and is waterproof. With no brand name and originating from Guangdong, China, our product customization services guarantee delivery within 15-20 workdays. Our customization services ensure that your battery needs are met with precision and care. The aluminum enclosure is anodized to provide an extra layer of protection against wear and tear, ensuring that your power station is built to last.
