

Bendable Extruded LED Aluminum Profile Channel Antirust

Our Product Introduction

for more products please visit us on alu-heatsink.com

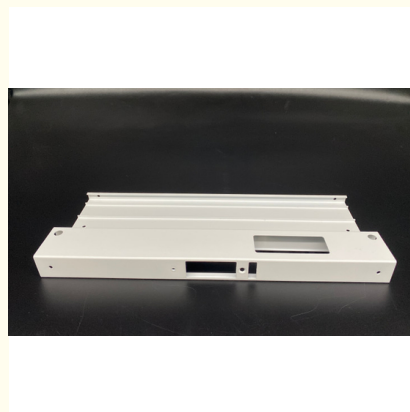

Basic Information

- Place of Origin: China, Guangdong
- Brand Name: No Brand
- Payment Terms: L/C, T/T, Western Union, MoneyGram

Product Specification

- Width: Customizable
- Thickness: Customizable
- Surface Treatment: Anodized, Coating
- Heat Dissipation: Efficient
- Durability: High
- Material: Aluminum
- Shape: Customizable
- Application: Lighting Industry
- Highlight: **Extruded LED Aluminum Profile,
Bendable LED Aluminum Profile,
Bendable extruded aluminum led channel**

Product Description

Product Description:

The LED Aluminum Profile is an ideal product for the education LED light industry. It is customizable in width to fit your specific needs, making it a versatile product for any project. The surface treatment options of anodized and coating ensure that the product is protected and long-lasting.

This LED Aluminum Profile is sure to enhance the efficiency of your strip light. The high-quality material and design allow for optimum heat dissipation, ensuring that your LED light stays cool and operates at maximum efficiency. The profile is also customizable, making it a great option for a wide range of strip light applications.

Our LED Aluminum Profile offers high durability, making it an ideal choice for the lighting industry. The surface treatment options of anodized and coating provide additional protection, ensuring that your product lasts for years to come. The customizable width allows for versatility in any project, making it a must-have product for the education LED light industry.

Overall, our LED Aluminum Profile is an excellent choice for anyone in the lighting industry. It offers high durability and efficient heat dissipation, making it a reliable and long-lasting option. The customizable width and surface treatment options make it a versatile product for any project, particularly in the education LED light industry.

Features:

Product Name: LED Aluminum Profile

Installation Type: Surface Mount

Length: Customizable

Thickness: Customizable

Corrosion Resistance: Yes

Heat Dissipation: Efficient

This LED Aluminum Profile is suitable for installation with education led lights, strip lights, and led wall washers. Its customizable length and thickness, efficient heat dissipation, and corrosion resistance make it a perfect choice for your lighting needs.

Technical Parameters:

Length:	Customizable
Corrosion Resistance:	Yes
Installation Type:	Surface Mount
Width:	Customizable
Durability:	High
Surface Treatment:	Anodized, Coating
Heat Dissipation:	Efficient
Material:	Aluminum
Shape:	Customizable
Thickness:	Customizable

Applications:

The LED Aluminum Profile is an ideal product for a range of strip light applications. It can be used in numerous indoor and outdoor settings, including homes, offices, commercial buildings, and public areas. The profile is perfect for creating an ambient lighting effect, illuminating walkways, or accentuating specific areas. With its high durability, it is perfect for use in areas with high foot traffic or areas that are exposed to the elements.

The LED Aluminum Profile is an excellent choice for strip light applications in homes and offices. It can be used to create indirect lighting, which is especially useful in rooms with low ceilings or limited natural light. The profile can be installed as a border around the ceiling or wall, providing a soft and warm glow that is easy on the eyes. Additionally, the profile can be used to highlight certain areas, such as artwork or shelves, adding depth to the room.

In commercial settings, the LED Aluminum Profile is an ideal product for strip light applications. It can be used to create a welcoming atmosphere in hotels, restaurants, and bars. The profile can be installed as a border around the ceiling or wall, providing a soft and warm glow that is sure to impress guests. Additionally, the profile can be used to illuminate pathways, making it easy for guests to navigate through the building. In public areas such as airports or train stations, the profile can be used to create a calming atmosphere, reducing stress and anxiety.

In conclusion, the LED Aluminum Profile is a highly versatile product that can be used in a range of strip light applications. It is durable, corrosion-resistant, and customizable, making it a perfect fit for a variety of occasions and scenarios. Whether it is used in homes, offices, commercial buildings, or public areas, the LED Aluminum Profile is sure to provide a soft and warm glow that is both welcoming and calming.

Customization:

Packing and Shipping:
