Technical Parameters:

Color	Customized
Width	Customizable
Heat Dissipation	Efficient
Installation Type	Surface Mount
Material	Aluminum
Length	Customizable
Durability	High
Thickness	Customizable
Shape	Customizable
Corrosion Resistance	Yes

Applications:

The LED Aluminum Profile is made from high-quality aluminum, which makes it both durable and lightweight. The product is manufactured in Guangdong, China, ensuring that it meets the highest quality standards. The width and thickness of the profile can be customized to meet your specific needs, and a variety of colors are available to match your decor. The surface treatment options of anodized and coating further enhance the durability of the product.

One of the most popular applications for the LED Aluminum Profile is in the education sector. It is often used to create LED light fixtures for classrooms and lecture halls. The sleek and modern design of the profile helps to create a comfortable and inviting learning environment. The customizable shape of the product ensures that it can be used to create a variety of lighting solutions, from overhead fixtures to wall-mounted sconces.

In addition to education, the LED Aluminum Profile is also commonly used in retail settings. It can be used to create eye-catching displays and to highlight products in a way that is both stylish and functional. The customizable width and thickness of the product make it easy to create a variety of different display configurations, while the range of available colors ensures that it can be matched to any retail decor.

The LED Aluminum Profile is also a great choice for home lighting solutions. It can be used to create custom LED light fixtures that are both functional and stylish. The product's durability and lightweight nature make it easy to install and maintain, while the customizable shape and color options allow you to create a lighting solution that perfectly matches your home decor.

In conclusion, the LED Aluminum Profile is a versatile and high-quality product that can be used in a wide range of settings and scenarios. Its durability, lightweight nature, and customizable options make it the perfect choice for education, retail, and home lighting solutions.

Customization:

The aluminum profile can also be customized in color, making it a versatile product that can match any lighting industry application. Whether for indoor or outdoor use, our LED Aluminum Profile can deliver the perfect lighting solution that you need.

Choose No Brand LED Aluminum Profile for your next project and experience the best quality and customization services that we offer!

Packing and Shipping:

The LED Aluminum Profile will be packaged securely to ensure safe delivery. Each profile will be wrapped in bubble wrap and placed in a sturdy cardboard box with packing peanuts to prevent any movement during shipping.

Shipping:

The LED Aluminum Profile will be shipped via standard ground shipping. Orders will be processed within 24-48 hours and delivery time will depend on the destination. Customers will receive a tracking number via email once their order has shipped.
