

OEM Industrial LED Aluminum Profile Channel For Strips

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: China,Guangdong
- Brand Name: No Brand
- Payment Terms: L/C, T/T, Western Union, MoneyGram

Product Specification

- Durability: High
- Material: Aluminum
- Heat Dissipation: Efficient
- Length: Customizable
- Application: Lighting Industry
- Width: Customizable
- Color: Customized
- Thickness: Customizable
- Highlight: **Industrial LED Aluminum Profile,
OEM LED Aluminum Profile,
Industrial aluminum channel for led strips**

Product Description

Product Description:

One of the unique features of this product is its surface treatment. The LED Aluminum Profile comes in two surface treatments: anodized and coating. Anodized surface treatment provides a protective layer that enhances the product's corrosion resistance, making it an ideal choice for outdoor spaces. Coating surface treatment, on the other hand, gives the product a polished finish, perfect for indoor spaces. The LED Aluminum Profile is customizable in terms of length and width, making it a versatile product that can fit any space. Whether you need a long LED wall washer for your hallway or a small education LED light for your classroom, this product can be tailored to your specific requirements.

Another advantage of our LED Aluminum Profile is its superior corrosion resistance. The anodized surface treatment makes it resistant to rust and other forms of corrosion, ensuring the product's longevity. This feature makes it an excellent choice for outdoor spaces, where exposure to harsh weather conditions can be a challenge.

Installation of our LED Aluminum Profile is a breeze. It is designed for surface mount installation, making it easy to install on any surface. This feature also makes it an excellent choice for educational institutions where a quick and easy installation is a must.

Overall, our LED Aluminum Profile is an excellent choice for anyone looking for a reliable and durable lighting solution. Its customizable length and width, corrosion resistance, and surface treatment options make it a versatile product that can fit any space. Whether you need a long LED wall washer or a small education LED light, this product is sure to meet your needs.

Features:

Product Name: LED Aluminum Profile

Material: Aluminum

Heat Dissipation: Efficient

Color: Customized

Durability: High

Shape: Customizable

Keywords: led wall washer, aluminum, education led light

Technical Parameters:

Thickness	Customizable
Width	Customizable
Heat Dissipation	Efficient
Material	Aluminum
Corrosion Resistance	Yes
Color	Customized
Shape	Customizable
Surface Treatment	Anodized, Coating
Length	Customizable
Durability	High

Applications:

The LED Aluminum Profile is customizable in terms of shape and length, allowing it to fit seamlessly into any lighting design. The color is also customizable, enabling it to blend in with the surrounding environment and create a cohesive look.

One of the primary applications of LED Aluminum Profile is in the education sector. It is an ideal product for creating education LED light fixtures that provide a comfortable and productive learning environment. LED lights are known to improve concentration and reduce eye strain, making them a popular choice for classrooms, libraries, and other educational spaces.

The aluminum construction of the LED Aluminum Profile is also a significant advantage, as it provides durability and resistance to wear and tear. This makes it an ideal choice for use in schools, where the lighting fixtures are subject to frequent use and handling.

LED Aluminum Profile is also a popular choice for use in retail environments, where it can be used to create attractive and functional lighting displays. The customizable shape and length of the product make it easy to create unique and eye-catching lighting designs that help to showcase products and attract customers.

The efficient heat dissipation of the LED Aluminum Profile is another significant advantage, as it helps to reduce the risk of overheating and prolong the lifespan of the lighting fixtures. This is particularly important in environments such as schools and retail spaces, where the lighting fixtures are in constant use.

In conclusion, the LED Aluminum Profile is a versatile and high-quality product that is ideal for a wide range of lighting applications in the education sector and beyond. Its customizable shape and length, efficient heat dissipation, and durable aluminum construction make it a popular choice for creating attractive and functional lighting fixtures that enhance the learning and shopping experience.

Customization:

Packing and Shipping:

Product Packaging:
The LED Aluminum Profile product will be packaged in a sturdy cardboard box to ensure safe delivery. Each profile will be individually wrapped and protected with foam padding to prevent any damage during shipping.

Shipping:
The LED Aluminum Profile product will be shipped via standard ground shipping. Depending on the destination, delivery time may vary. Customers will be provided with a tracking number to monitor the status of their shipment.
