

## Extruded Die Cast Aluminum Heat Sink for Electronic Components

Our Product Introduction

for more products please visit us on [alu-heatsink.com](http://alu-heatsink.com)

### Basic Information

- Place of Origin: China, Guangdong
- Brand Name: No Brand
- Payment Terms: L/C, T/T, Western Union, MoneyGram

### Product Specification

- Sample Leadtime: 15 Days
- Durability: High
- Surface Treatmentment: Anodized, Painted, Customized
- Thermal Conductivity: High
- Sample: Available
- Mounting Type: Vertical
- Compatibility: Universal
- Alloy: 6063
- Highlight: Extruded die cast aluminum heat sink,  
Electronic die cast aluminum heat sink,  
Electronic extruded aluminum heatsinks

## Product Description

### Product Description:

With its durable construction, this heatsink is built to withstand the rigors of extended use and can provide long-lasting performance. Its universal compatibility allows it to be used with a wide variety of devices, making it a versatile option for various cooling needs. Our aluminum heatsink comes in various sizes to accommodate different applications. Whether you need a small heatsink for a compact device or a larger one for a power-hungry application, we have you covered. If you're looking for an effective way to keep your electronic devices cool, our aluminum heatsink is an excellent choice. Its high thermal conductivity, durable construction, and universal compatibility make it a reliable option for a variety of applications.

### Features:

Product Name: Aluminum Heatsink  
Sample Leadtime: 15 Days  
Alloy: 6063  
Compatibility: Universal  
Dimensions: Various Sizes Available  
Thermal Conductivity: High  
Suitable for: Power station  
Suitable for: LED Lighting  
Suitable for: Electronic Components

### Technical Parameters:

Surface Treatment:	Anodized, Painted, Customized
Compatibility:	Universal
Mounting Type:	Vertical
Alloy:	6063
Durability:	High
Thermal Conductivity:	High
Sample:	Available
Sample Leadtime:	15 Days
Dimensions:	Various Sizes Available

### Applications:

One of the most common applications of this product is in LED lighting. The Aluminum Heatsink can be used to dissipate heat generated by LED light bulbs and panels, which can prolong their lifespan and prevent malfunctions due to overheating. This product is also compatible with various types of LED lights and can be used to customize lighting solutions for different needs. Whether it's for indoor or outdoor use, the Aluminum Heatsink is an ideal solution for LED lighting.

Another application of the Aluminum Heatsink is in power stations. The product can be used to dissipate heat generated by power transformers, which can prevent damage to the transformers and ensure that they operate efficiently. With its high thermal conductivity, the Aluminum Heatsink can also be used to regulate the temperature of electronic devices in power stations, preventing them from overheating and causing malfunctions.

Overall, the Aluminum Heatsink is a versatile product that can be used in various scenarios that require heat dissipation. This product is also available as a sample, with a lead time of 15 days, making it easy for customers to test its compatibility with their devices. Get your hands on the Aluminum Heatsink today and experience its high-quality performance!

### Customization:

### Packing and Shipping:

The aluminum heatsink will be securely packed in a cardboard box to prevent any damage during shipping.

The box will also contain foam padding to provide extra protection.

The product will be accompanied by a user manual.

Shipping:

The product will be shipped via a reputable courier service to ensure timely delivery.

Shipping costs will be calculated based on the destination and weight of the package.

Customers will receive a tracking number to monitor the progress of their shipment.
