

Corrosion Resistance LED Aluminum Profile For Strip Light Custom

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: China,Guangdong
- Brand Name: No Brand

Product Specification

- Corrosion Resistance: Yes
- Heat Dissipation: Efficient
- Width: Customizable
- Thickness: Customizable
- Material: Aluminum
- Surface Treatment: Anodized, Coating
- Length: Customizable
- Durability: High
- Highlight: **Corrosion Resistance LED Aluminum Profile,
Strip Light LED Aluminum Profile,
Corrosion Resistance led strip profile
aluminium**

Product Description

Product Description:

The LED Aluminum Profile is customizable in shape and color, making it an excellent choice for those who want to create unique and innovative lighting designs. You can choose the shape and color that best suits your needs, which makes it an excellent option for architects, interior designers, and lighting designers. The LED Aluminum Profile is perfect for creating a sleek and modern look, making it a popular choice for LED wall washer lighting, strip light fixtures, and other lighting applications.

Our LED Aluminum Profile is easy to install and comes with all the necessary components to make the installation process hassle-free. You can easily mount the LED Aluminum Profile on any surface using the mounting brackets provided, and the end caps ensure a clean and finished look. The LED Aluminum Profile is also designed with a heat sink that helps to dissipate heat, ensuring that the LED strip lights operate at their optimal level.

The LED Aluminum Profile is highly versatile and can be used in various lighting applications, including residential, commercial, and industrial settings. It is perfect for creating accent lighting, task lighting, and ambient lighting, making it an excellent choice for homes, offices, and public spaces. The LED Aluminum Profile is also ideal for outdoor lighting applications, as it is durable and can withstand harsh weather conditions.

In conclusion, our LED Aluminum Profile is an excellent choice for anyone in the lighting industry who wants a high-quality, durable, and customizable product. It is perfect for creating unique and innovative lighting designs and is compatible with various LED strip lights. The LED Aluminum Profile is easy to install, versatile, and perfect for various lighting applications, making it an excellent investment for architects, interior designers, and lighting designers.

Features:

Product Name: LED Aluminum Profile

Corrosion Resistance: Yes

Installation Type: Surface Mount

Material: Aluminum

Width: Customizable

Thickness: Customizable

This LED Aluminum Profile is made of durable aluminum, ensuring corrosion resistance. It is designed for surface mount installation and can be customized in width and thickness to fit your specific needs. This product is perfect for use as an LED wall washer or for educational LED lighting projects.

Technical Parameters:

Length	Customizable
Installation Type	Surface Mount
Surface Treatment	Anodized, Coating
Material	Aluminum
Durability	High
Color	Customized
Corrosion Resistance	Yes
Application	Lighting Industry
Heat Dissipation	Efficient
Shape	Customizable

Applications:

The LED Aluminum Profile is perfect for use in LED wall washer applications. As a material, aluminum is known for its excellent heat dissipation properties, which makes it an ideal material for use in LED lighting. The LED Aluminum Profile is compatible with a wide range of LED light strips and modules, which makes it a versatile product that can be used in a variety of lighting applications. These include commercial lighting, residential lighting, and even stage lighting.

Another application of the LED Aluminum Profile is in education LED light applications. LED lighting is becoming increasingly popular in educational environments as it provides a brighter, more energy-efficient alternative to traditional lighting. The LED Aluminum Profile is an ideal product for use in these applications as it is easy to install and can be customized to fit any space. This makes it an excellent choice for schools, colleges, and universities that are looking for a high-quality, reliable LED lighting solution.

The shape of the LED Aluminum Profile is customizable, which makes it ideal for use in a variety of product application scenarios. It can be used to create customized lighting solutions for a range of different environments, including retail spaces, museums, and exhibitions. The LED Aluminum Profile is also an excellent choice for use in architectural lighting applications, where it can be used to create dramatic lighting effects that highlight the unique features of a building.

In conclusion, the LED Aluminum Profile is a high-quality, versatile product that is ideal for use in a variety of product application occasions and scenarios. Its aluminum construction provides excellent corrosion resistance properties, while its customizable length and thickness make it suitable for use in a range of different lighting applications. Whether you are looking for a LED wall washer solution, an education LED light solution, or a customized architectural lighting solution, the LED Aluminum Profile is an excellent choice.

Customization:

Additionally, our LED Aluminum Profile is customizable in terms of its width, with options tailored to fit your specific needs. This product is also highly resistant to corrosion, ensuring its longevity. Lastly, you can choose a custom color to match your project's aesthetics and needs.

Packing and Shipping:

The LED Aluminum Profile product will be securely packaged in a cardboard box to ensure safe delivery. The box will be labeled with the product name, description, and any necessary handling instructions.

Shipping:

The LED Aluminum Profile product will be shipped via a reputable courier service such as FedEx or UPS. Shipping times will vary depending on the destination, but customers can expect to receive their product within 3-7 business days.
