Product Description

Product Description:

Our LED Aluminum Profile is perfect for the education LED light industry. It provides a sleek and modern look to any classroom or lecture hall, while also providing efficient and effective lighting for students and educators alike. Additionally, our LED Aluminum Profile is perfect for LED wall washer applications, providing a bright and even light to any wall or surface.

In addition to its many benefits, our LED Aluminum Profile is also highly customizable. Choose from a variety of colors to match your specific design needs, ensuring that our product will blend seamlessly into any environment. Our product is also customizable in terms of thickness, allowing for a perfect fit for any project.

Our LED Aluminum Profile is also designed to work seamlessly with strip light applications. Our product provides a secure and stable base for strip lights, ensuring that your lighting will be both functional and aesthetically pleasing.

In conclusion, our LED Aluminum Profile is the perfect solution for all your lighting industry needs. With its surface mount installation type, anodized and coating surface treatment, customizable thickness, and a variety of color options, our product is sure to meet your every need. Additionally, our product is perfect for education LED light and LED wall washer applications, as well as strip light installations.

Features:

Product Name: LED Aluminum Profile

Material: Aluminum

Installation Type: Surface Mount

Application: Lighting Industry

Width: Customizable

Durability: High

This LED Aluminum Profile is perfect for the education led light industry due to its high durability and customizable width. It can be easily mounted on surfaces and is ideal for applications such as led wall washer lighting.

Technical Parameters:

Material	Aluminum
Width	Customizable
Thickness	Customizable
Length	Customizable
Surface Treatment	Anodized, Coating
Color	Customized
Heat Dissipation	Efficient
Corrosion Resistance	Yes
Durability	High
Application	Lighting Industry, LED wall washer, Education LED light

Applications:

The LED Aluminum Profile is widely used in the lighting industry. It is a perfect product for creating a clean, professional, and modern look for any lighting application. The product is manufactured in China, Guangdong, and is available in customized colors and thicknesses. The surface treatment options include anodized and coating, which provide excellent durability and a sleek finish.

Product Application Occasions:

The LED Aluminum Profile is an ideal product for creating LED wall washers. The product's design allows the LED light to be evenly distributed, providing an excellent wall washing effect. The LED wall washers are perfect for creating a dramatic effect in any space, such as a hotel lobby or a conference room.

The product is also great for education LED light applications. The LED Aluminum Profile can be used for lighting in classrooms, libraries, and other educational facilities. The product's sleek design will add a modern touch to the space, creating a comfortable and productive learning environment.

Product Application Scenarios:

The LED Aluminum Profile is perfect for surface mount installations. The product can be used for surface mount installations in various applications, including retail stores, offices, and residential homes. The product's surface mount installation allows for easy and quick installation, making it an ideal product for those who want to add a modern touch to their space without any hassle.

The product's aluminum construction provides excellent durability and is lightweight, making it easy to handle and install. The product can be customized to fit any lighting application, making it a versatile product that can be used in various scenarios.

In conclusion, the LED Aluminum Profile is an excellent product for anyone looking to create a clean, professional, and modern look in their lighting application. The product's design allows for even LED light distribution, making it ideal for LED wall washers. The product is also great for education LED light applications and can be used for surface mount installations in various scenarios.

Customization:

Packing and Shipping:

The LED Aluminum Profile will be carefully packed in a sturdy cardboard box to prevent any damage during transportation.

Shipping:

We offer worldwide shipping for the LED Aluminum Profile. The shipping cost and delivery time will vary depending on your location and shipping method selected at checkout.
