

Custom 6063 Anodized Aluminum Extruded Heat Sink Thermal Conductivity

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: China, Guangdong
- Brand Name: No Brand

Product Specification

- Sample: Available
- Thermal Conductivity: High
- Mounting Type: Vertical
- Surface Treatmentment: Anodized, Painted, Customized
- Sample Leadtime: 15 Days
- Dimensions: Various Sizes Available
- Alloy: 6063
- Durability: High
- Highlight: 6063 Aluminum extruded heat sink,
Anodized extruded heat sink,
custom aluminum heatsink Anodized

Product Description

Product Description:

Our Aluminum Heatsink is the perfect solution for cooling your power station or LED heat sink. It is designed with a vertical mounting type to optimize space and can be easily installed for your convenience.

With a sample leadtime of 15 days, you can quickly get your hands on this product and experience its benefits firsthand.

This Aluminum Heatsink is available in three different surface treatment options: anodized, painted, and customized. The anodized option provides an extra layer of protection against harsh environments and is perfect for outdoor applications. The painted option offers a sleek and professional look, while the customized option allows you to tailor the product to your specific needs.

Additionally, this product is designed to be compatible with a variety of applications, making it a versatile choice for any project you have in mind.

Invest in our Aluminum Heatsink today and experience the benefits of a highly durable and efficient cooling solution.

Features:

Product Name: Aluminum Heatsink

Surface Treatmentment: Anodized, Painted, Customized

Compatibility: Universal

Dimensions: Various Sizes Available

Sample Leadtime: 15 Days

Thermal Conductivity: High

This heat sink extrusion is perfect for use with LED Lighting.

Applications:

One of the most common applications of Aluminum Heatsink is in the power station industry. The product is used to dissipate heat away from power transformers, rectifiers, and other electronic components in power stations. As we all know, power stations generate a lot of heat, and it is crucial to have a product that can efficiently dissipate heat away from electronic components. Aluminum Heatsink is a perfect solution for this application.

Another application of Aluminum Heatsink is in LED lighting. The product is used to dissipate heat away from LED lights, which generate a lot of heat. LED lights are widely used in various industries, including automotive, aerospace, and architecture. In these industries, LED lights are often exposed to harsh environments, which can cause them to overheat. Aluminum Heatsink is a perfect solution for this application as it efficiently dissipates heat away from LED lights, thus ensuring their longevity.

Aluminum Heatsink is also used in the computer industry. It is used to dissipate heat away from microprocessors, which generate a lot of heat. In computer systems, it is crucial to have a product that can efficiently dissipate heat away from microprocessors as overheating can cause a system to malfunction. Aluminum Heatsink is a perfect solution for this application.

Overall, Aluminum Heatsink is a versatile product that can be used in various industries. It is a product that offers high durability and reliability. If you are looking for a product that can efficiently dissipate heat away from electronic components, then Aluminum Heatsink is the perfect solution for you. The product is made in China, Guangdong, and is readily available. If you need a sample, it can be provided, and the sample lead time is only 15 days.

Customization:

Brand Name: No Brand

Place of Origin: China, Guangdong

Surface Treatment: Anodized, Painted, Customized

Mounting Type: Vertical

Compatibility: Universal

Sample Leadtime: 15 Days

Dimensions: Various Sizes Available

Make your Aluminum Heat Sink extrusion unique to your needs with our customization options. Choose from a variety of surface treatments including anodized, painted, and customized options. Our extrusions come in various sizes and are compatible with universal mounting types making it easy to fit your specific needs. Our sample leadtime is only 15 days. Trust our No Brand Aluminum Heat Sink product to provide you with quality customization services for your next project.

Packing and Shipping:

Product Packaging:

The Aluminum Heatsink comes in a sturdy cardboard box with foam padding to protect the product during transit. The product is wrapped in bubble wrap to prevent any scratches or dents.

Shipping:

The product will be shipped via ground shipping to the address provided during checkout. Shipping typically takes 3-5 business days depending on the destination. A tracking number will be provided once the product has been shipped.
