

OEM 6063 Alloy Aluminum Heatsink Plate With Thermal Conductivity

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: China, Guangdong
- Brand Name: No Brand

Product Specification

- Thermal Conductivity: High
- Alloy: 6063
- Durability: High
- Compatibility: Universal
- Mounting Type: Vertical
- Dimensions: Various Sizes Available
- Sample Leadtime: 15 Days
- Sample: Available
- Highlight: **OEM Aluminum Heatsink,
Thermal Conductivity Aluminum Heatsink,
OEM aluminium heat sink plate**

Product Description

Product Description:

Available in various sizes to fit your specific needs, this heat sink is perfect for a wide range of applications, from industrial machinery to consumer electronics. The vertical mounting type makes it easy to install and ensures stable and secure mounting. With its anodized surface treatment, this aluminum heat sink provides excellent corrosion resistance and a sleek, professional look that will complement any design. Additionally, it can be customized with a painted finish to match your specific color requirements. Not sure if this heat sink is right for you? No problem. We offer samples for you to test and evaluate before making a purchase, so you can be sure that you are getting the right product for your needs. Invest in the best with our Aluminum Heat Sink Extrusion. With its superior quality and performance, it is the perfect choice for anyone looking for a reliable and long-lasting heat dissipation solution.

Features:

Product Name: Aluminum Heatsink
Durability: High
Compatibility: Universal
Surface Treatment: Anodized, Painted, Customized
Thermal Conductivity: High
Sample Leadtime: 15 Days
Application: heat sink extrusion, Power station, led heat sink

Applications:

LED Heat Sink

LED heat sink is one of the most common applications of aluminum heatsinks. LED lights generate a significant amount of heat during operation, which can damage the device if not dissipated. Aluminum heatsinks are used in LED lights to dissipate heat and prolong the life of the device. The heat sink extrusion is designed to provide a larger surface area to dissipate heat effectively. Aluminum heatsinks are also used in LED displays, traffic lights, and other LED applications.

Universal Compatibility

Aluminum heatsinks are compatible with a wide range of electronic devices, making them a versatile cooling solution. They can be used in computers, audio amplifiers, power supplies, and other electronic devices that generate significant amounts of heat. The heatsinks can be customized to fit the specific needs of the device, making them an ideal solution for various applications.

Various Sizes Available

Aluminum heatsinks are available in various sizes, making them suitable for different applications. The size of the heatsink is determined by the size of the device and the amount of heat generated. Heatsinks are available in standard sizes, and custom sizes can also be made to fit specific requirements. The availability of different sizes makes it easy to find a suitable heatsink for any application.

Sample Available

Before purchasing aluminum heatsinks, it is essential to test their compatibility and effectiveness. Samples of the heatsinks are available to test their performance and determine their suitability for the application. This ensures that the heatsinks meet the requirements and perform effectively.

In conclusion, aluminum heatsinks are essential cooling components used in various electronic applications. They are compatible with a wide range of devices, available in different sizes, and can be customized to fit specific requirements. With high thermal conductivity, they effectively dissipate heat, making them ideal for LED lights, power supplies, and other electronic devices that generate significant amounts of heat.

Customization:

Our aluminum heat sink is proudly made in China, Guangdong and has a sample lead time of 15 days. With our product customization services, you can choose the mounting type that best fits your requirements, such as vertical mounting. Choose No Brand for your next heat sink extrusion customization, and get the product you need to keep your systems running cool and efficiently.

Packing and Shipping:

Product Name: Aluminum Heatsink
Quantity: 1
Dimensions: 4 inches x 4 inches x 1 inch
Weight: 0.5 lbs
Material: Aluminum
Package Contents: 1 Aluminum Heatsink
Shipping Method: Standard Shipping
Shipping Cost: \$5.99
