

## Customized Nickel Plated Aluminum Profile For Lighting

Our Product Introduction

for more products please visit us on [alu-heatsink.com](http://alu-heatsink.com)

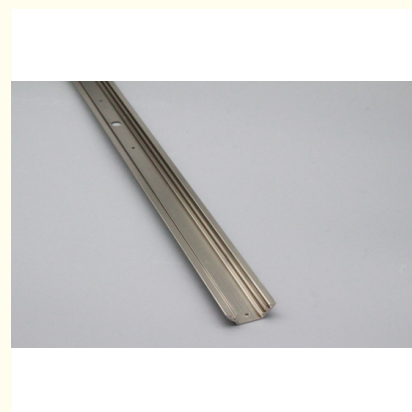

### Basic Information

- Place of Origin: China,Guangdong
- Brand Name: No Brand
- Delivery Time: 10-15 Workdays
- Payment Terms: L/C, T/T, Western Union, MoneyGram

### Product Specification

- Durability: High
- Shape: Customizable
- Heat Dissipation: Efficient
- Material: Aluminum
- Width: Customizable
- Surface Treatment: Anodized, Coating, Nickel Plated
- Installation Type: Surface Mount
- Thickness: Customizable
- Highlight: **Customized Aluminum Profile,  
Nickel plated Aluminum Profile,  
Lighting Aluminum Profile**

## Product Description

### Product Description:

Our LED Aluminum Profile is the perfect solution for strip light applications. It is designed to provide a secure and stable mounting surface for LED strip lights, ensuring that they are installed safely and efficiently. The aluminum material is perfect for dissipating heat, which helps to extend the lifespan of the strip lights.

This product is highly durable and can withstand tough conditions, making it perfect for use in various lighting applications. Its corrosion-resistant properties make it ideal for use in outdoor environments, as it can withstand exposure to harsh weather conditions. Additionally, the aluminum material is lightweight, making it easy to transport and install.

Our LED Aluminum Profile is easy to install and can be customized to fit any lighting project. It is designed to provide a professional and sleek finish to any lighting installation, making it perfect for use in commercial and residential settings. Its versatility and durability make it a cost-effective solution for any lighting project.

In conclusion, if you are looking for a high-quality and durable solution for your strip light applications, our LED Aluminum Profile is the perfect product for you. Its customizable width, aluminum material, corrosion resistance, and high durability are some of the features that make it stand out from the rest. Order yours today and take your lighting installations to the next level!

### Features:

Product Name: LED Aluminum Profile

Application: Lighting Industry

Surface Treatment: Anodized, Coating, Nickel plated

Length: Customizable

Color: Customized

Durability: High

Perfect for led light

Made of durable aluminum

Ideal for LED wall washer

### Technical Parameters:

Corrosion Resistance	Yes
Durability	High
Heat Dissipation	Efficient
Width	Customizable
Shape	Customizable
Installation Type	Surface Mount
Color	Customized
Application	Lighting Industry
Surface Treatment	Anodized, Coating, Nickel plated
Thickness	Customizable

### Applications:

One of the most common applications of LED Aluminum Profile is in the education sector. This product is perfect for use in classrooms, libraries, and other educational settings where bright, high-quality lighting is essential. LED Aluminum Profiles can be used to create education led lights that provide optimal lighting for studying, reading, and other tasks that require a focused and well-lit environment. With customizable shapes and sizes, educators can create customized lighting solutions that meet the specific needs of their students.

Another popular use for LED Aluminum Profile is in architectural lighting. This product can be used to create stunning LED wall washers that can be used to highlight architectural features and create a dramatic lighting effect. With anodized and coating surface treatments available, LED Aluminum Profile can be used to create a range of different finishes that add to the aesthetic appeal of buildings and other structures.

Finally, LED Aluminum Profile is also perfect for use in commercial and industrial settings. This product can be used to create customized lighting solutions for manufacturing plants, warehouses, and other industrial environments where lighting is essential. With customizable widths, shapes, and thicknesses, LED Aluminum Profiles can be used to create lighting solutions that are tailored to meet the specific needs of different industries.

### Packing :

The LED Aluminum Profile will be carefully packed in a sturdy cardboard box to prevent any damage during transportation.
