

Customized Photovoltaic Solar Panel Frame Alu Profile For Sustainable Energy Production

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300kilogram
- Packaging Details: protect film
- Delivery Time: 15-30days
- Payment Terms: L/C, T/T

Product Specification

- Thickness: Customized
- Application: Solar Energy System
- Surface Treatment: Anodized
- Color: Black
- Shape: Customized
- Width: Customized
- Length: Customized
- Usage: Solar Panel Frame
- Highlight: **Customized Solar Panel Frame Alu Profile, Photovoltaic Solar Panel Frame Alu Profile**

Product Description

Product Description:

The Solar Photovoltaic Panels Frame Alu Profile is a versatile product designed for the solar energy system industry. Its shape can be customized to meet specific requirements, making it suitable for various solar panel frame applications. This aluminum profile is lightweight and durable, offering a reliable solution for supporting solar panels.

With its focus on solar energy system applications, this aluminum profile is an essential component for constructing solar panel frames. Its customizable shape allows for flexibility in design, ensuring a precise fit for different solar panel configurations. Whether for residential, commercial, or industrial solar projects, this product is designed to enhance the efficiency and durability of solar energy systems.

One of the key features of this aluminum profile is its lightweight construction, which makes it easy to handle and install. Despite its lightweight nature, this profile is highly durable, providing long-lasting support for solar panels in various environmental conditions. The combination of lightweight design and durability makes this product an ideal choice for both manufacturers and installers of solar energy systems.

Moreover, the availability of OEM and ODM services for this aluminum profile allows for customization according to specific project requirements. Whether a unique shape or a specific finish is needed, the OEM and ODM options ensure that the product can be tailored to meet individual preferences. This flexibility in customization makes the aluminum profile suitable for a wide range of solar energy system applications.

In conclusion, the Solar Photovoltaic Panels Frame Alu Profile is a reliable and versatile product that offers lightweight and durable support for solar panels. Its customizable shape, tailored for solar energy system applications, ensures a precise fit for various solar panel frame designs. With OEM and ODM options available, this aluminum profile can be customized to meet specific project requirements, making it a valuable component for enhancing the efficiency and longevity of solar energy systems.

Features:

Product Name: Solar Photovoltaic Panels Frame Alu Profile

Oem/Odm: Available

Usage: Solar Panel Frame

Application: Solar Energy System

Thickness: Customized

Width: Customized

Technical Parameters:

Surface Treatment	Anodized
Feature	Lightweight And Durable
Thickness	Customized
Oem/Odm	Available
Color	Black
Material	Aluminum
Width	Customized
Usage	Solar Panel Frame
Application	Solar Energy System
Length	Customized

Applications:

The Solar Photovoltaic Panels Frame Alu Profile by Golden Chain is a versatile product suitable for a wide range of applications in the solar energy industry. With its high-quality Aluminum Profile construction and Anodized surface treatment, this product is designed to provide durability and longevity in various environments.

One of the key Product Application Occasions for this Aluminum Profile is in the installation of solar photovoltaic panels. The Aluminium Photovoltaic Mounting System offers a secure and reliable framework for mounting solar panels, ensuring optimal performance and efficiency.

Whether it is for residential, commercial, or industrial use, the Golden Chain Solar Photovoltaic Panels Frame Alu Profile can be customized in terms of Length, Shape, and Thickness to suit different project requirements. This flexibility makes it ideal for a variety of scenarios, from rooftop solar installations to large-scale solar farms.

Manufactured in Guangdong, China, this product benefits from the region's reputation for quality manufacturing and innovation in the aluminum industry. The Brand Name Golden Chain is synonymous with excellence and reliability, making it a trusted choice for solar panel installers and developers.

In summary, the Solar Photovoltaic Panels Frame Alu Profile is a premium product that combines the strength of Aluminum Profile construction with the customization options needed for a successful solar panel installation. Its application occasions and scenarios are diverse, catering to the evolving needs of the solar energy market.

Customization:

Product Customization Services for the Aluminium Photovoltaic Mounting System Frame Alu Profile:
Brand Name: Golden Chain
Place of Origin: Guangdong, China
Material: Aluminum
Oem/Odm: Available
Width: Customized
Shape: Customized
Surface Treatment: Anodized,Power Coating

Packing and Shipping:

Product Packaging:
The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery. Each profile is wrapped in protective material and placed in a sturdy cardboard box with ample cushioning to prevent any damage during transit.
Shipping:
Ocean, Air, Express
