

Anodized Power Coating Solar Panel Frame For Photovoltaic Industry Needs

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300 Kilogram
- Packaging Details: protect film
- Delivery Time: 15-30 days
- Payment Terms: L/C, T/T

Product Specification

- Oem/Odm: Available
- Usage: Solar Panel Frame
- Surface Treatment: Anodized Power Coating
- Color: Black
- Material: Aluminum
- Feature: Lightweight And Durable
- Length: Customized
- Application: Solar Energy System
- Highlight: Photovoltaic Industry Solar Panel Frame, Anodized Solar Panel Frame, Anodized Power Coating Solar Panel Frame

Product Description

Product Description:

With a customized width, the Solar Panel Aluminium Profile allows for flexibility in designing and constructing solar panel frames to accommodate different sizes and configurations. This versatility makes it a suitable choice for various solar energy system setups, whether for residential, commercial, or industrial applications.

The surface treatment of the Solar Panel Aluminium Profile includes both anodized and power coating finishes. Anodizing enhances the durability and corrosion resistance of the aluminum profile, ensuring its longevity and performance under various environmental conditions. The power coating further adds a protective layer, providing additional protection against elements and extending the lifespan of the profile.

When it comes to solar panel frame construction, the quality of the materials used is crucial for the overall efficiency and durability of the system. The Solar Panel Aluminium Profile is manufactured with precision and high-quality standards to meet the demands of the photovoltaic industry. Its robust construction and reliable performance make it a preferred choice for solar panel manufacturers and installers.

Whether you are building a solar energy system for a residential rooftop or a large-scale solar farm, the Solar Panel Aluminium Profile offers the strength and stability needed to support solar panels and withstand environmental stressors. Its black color adds a modern touch to the solar panel installation, blending seamlessly with the overall design.

In addition to its functional benefits, the Solar Panel Aluminium Profile is also easy to install, saving time and labor costs during the solar panel frame assembly process. Its customized width allows for precise fitting and alignment, ensuring a secure and efficient mounting system for the solar panels.

Overall, the Solar Panel Aluminium Profile is a reliable and durable solution for solar panel frame construction in photovoltaic systems. With its black color, customized width, anodized, and power coating surface treatment, this aluminum profile offers both aesthetic appeal and performance efficiency for various solar energy applications.

Features:

Product Name: Solar Panel Aluminium Profile

Material: Aluminum

Usage: Solar Panel Frame

Color: Black

Length: Customized

Shape: Customized

Technical Parameters:

Color	Black
Usage	Solar Panel Frame
Thickness	Customized
Material	Aluminum
Width	Customized
Length	Customized
Feature	Lightweight And Durable
Application	Solar Energy System
Oem/Odm	Available
Shape	Customized

Applications:

The Golden Chain Solar Panel Aluminium Profile is a high-quality product originating from Guangdong, China, suitable for a variety of applications in the solar energy industry. With a minimum order quantity of 300 kilograms, this product is ideal for large-scale projects requiring durable and reliable materials.

The aluminium profile is designed to be used in the construction of Solar Panel Frames, making it an essential component for any solar energy system. Its customized shape allows for flexibility in design, ensuring a perfect fit for different solar panel configurations.

One of the key features of this product is its surface treatment, which includes anodized and power coating options. This treatment not only enhances the appearance of the aluminium profile but also provides protection against environmental factors, making it suitable for both indoor and outdoor use.

With a customized thickness, the Golden Chain Solar Panel Aluminium Profile offers strength and stability, crucial for supporting solar panels in various settings. Whether for residential, commercial, or industrial applications, this product is versatile enough to meet different project requirements.

When it comes to product delivery, customers can expect their orders to be processed within 15-30 days, ensuring timely project completion. The packaging details include a protective film to prevent any damage during transportation, giving customers peace of mind when receiving their orders.

For payment terms, both L/C and T/T options are available, providing flexibility for customers based on their preferences. Overall, the

Golden Chain Solar Panel Aluminium Profile is a reliable choice for those in need of high-quality materials for their Aluminium Photovoltaic Mounting System projects.

Customization:

Product Customization Services for the Solar Panel Aluminium Profile in Aluminium Photovoltaic Mounting System

Brand Name: Golden Chain
Place of Origin: Guangdong, China
Minimum Order Quantity: 300 Kilogram
Packaging Details: Protect Film
Delivery Time: 15-30 days
Payment Terms: L/C, T/T
Oem/Odm: Available
Color: Black
Thickness: Customized
Surface Treatment: Anodized, Power Coating
Width: Customized

Packing and Shipping:

Product Packaging:
The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery.
Shipping:
Ocean, Air, Express
