

Customized Length Aluminum Solar Panel Aluminium Profile Lightweight And Durable Durable Aluminum

Our Product Introduction

for more products please visit us on alu-heatsink.com

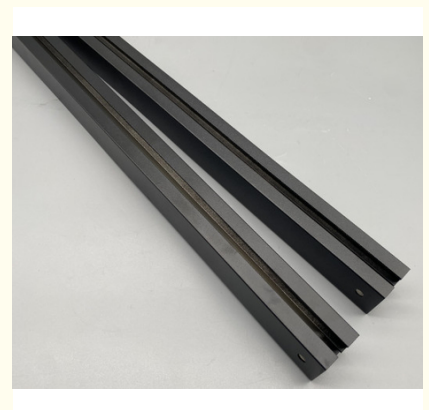

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300 Kilogram
- Packaging Details: protect film
- Delivery Time: 15-30 days
- Payment Terms: L/C, T/T

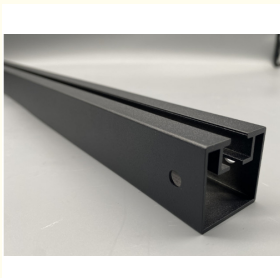

Product Specification

- Application: Solar Energy System
- Shape: Customized
- Width: Customized
- Length: Customized
- Surface Treatment: Anodized. Power Coating
- Thickness: Customized
- Color: Black
- Feature: Lightweight And Durable
- Highlight: **Lightweight Solar Panel Aluminium Profile, Durable Aluminum Solar Panel Aluminium Profile**
Customized Length Solar Panel Aluminium Profile

Product Description

Product Description:

The Solar Panel Aluminium Profile is a versatile and essential component for constructing solar panel frames. Made from high-quality aluminum material, this profile offers durability and strength to support the solar panels effectively. The customizable length and width options allow for flexibility in designing the solar panel frame according to specific project requirements.

Utilizing aluminum profiles for solar panel frames is a popular choice due to the material's lightweight nature, corrosion resistance, and ability to withstand various weather conditions. The aluminum profile ensures that the solar panels are securely held in place while optimizing their exposure to sunlight for maximum energy generation.

With a focus on sustainability and energy efficiency, the Solar Panel Aluminium Profile is designed to enhance the performance and longevity of solar panel installations. The customizable shape options enable seamless integration into different solar panel configurations, ensuring a precise and secure fit for optimal functionality.

Whether used in residential, commercial, or industrial solar projects, the Aluminum Profile for solar panels provides a reliable and efficient solution for framing and mounting solar panels. The high-quality aluminum material ensures long-term performance and minimal maintenance requirements, making it a cost-effective choice for solar energy systems.

By choosing the Solar Panel Aluminium Profile, customers can create customized solar panel frames that meet their specific size and design specifications. The versatility of the aluminum profile allows for easy assembly and installation, facilitating the setup of solar panel arrays with precision and stability.

Investing in the right components, such as the Aluminum Profile for solar panels, is crucial for the success and efficiency of solar energy systems. The use of high-quality materials, such as aluminum, ensures that the solar panel frames are durable, reliable, and capable of withstanding the rigors of outdoor environments.

In conclusion, the Solar Panel Aluminium Profile is an essential product for constructing robust and efficient solar panel frames. With its customizable length, width, and shape options, this aluminum profile offers versatility and reliability for various solar panel installations. Choosing the Aluminum Profile for solar panels ensures long-term performance, durability, and sustainability in harnessing solar energy for power generation.

Features:

Product Name: Solar-Panel Aluminium Profile

Feature: Lightweight And Durable

Color: Black

Length: Customized

Usage: Solar Panel Frame

Application: Solar Energy System

Technical Parameters:

Width	Customized
Thickness	Customized
Oem/Odm	Available
Application	Solar Energy System
Shape	Customized
Material	Aluminum
Length	Customized
Color	Black
Usage	Solar Panel Frame
Feature	Lightweight And Durable

Applications:

The Golden Chain Solar Panel Aluminium Profile is a high-quality product sourced from Guangdong, China. With a minimum order quantity of 300 kilograms, this product is perfect for various applications in the solar energy industry.

The aluminium profile is tailored for solar panel frames, making it an essential component for photovoltaic systems. Its customizable length and shape options ensure a perfect fit for different solar panel sizes and configurations. The black color of the profile adds a sleek and professional look to the solar panels.

With surface treatments like anodizing and power coating, the profile offers enhanced durability and corrosion resistance, ideal for outdoor use in photovoltaic installations. The power coating further protects the profile from environmental factors, ensuring a long lifespan for the solar panel frame.

When it comes to packaging, the product is carefully protected with a film to prevent any damage during transportation. The delivery time ranges from 15 to 30 days, offering a quick turnaround for your solar panel projects. For payment, options include L/C and T/T, providing flexibility for different purchasing preferences.

In conclusion, the Golden Chain Solar Panel Aluminium Profile is a versatile and reliable product designed for the solar energy industry. Whether you are working on residential or commercial photovoltaic projects, this profile is a perfect choice to ensure the structural

integrity and longevity of your solar panels.

Customization:

Product Customization Services for the Solar Panel Aluminium Profile: -----
Brand Name: Golden Chain
Place of Origin: Guangdong, China
Minimum Order Quantity: 300 Kilogram
Packaging Details: Protect film
Delivery Time: 15-30 days
Payment Terms: L/C, T/T
Width: Customized
Feature: Lightweight And Durable
Length: Customized
Shape: Customized
Surface Treatment: Anodized, Power Coating
Keywords: Power Coating, Solar, Aluminium Photovoltaic Mounting System

Packing and Shipping:

Product Packaging: -----
The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery.
Shipping:
Ocean, Air, Express
