

Solar Energy System Lightweight And Durable Solar Panel Aluminium Profile Customized Thickness Performance

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300 Kilogram
- Packaging Details: protect film
- Delivery Time: 15-30 days
- Payment Terms: L/C, T/T

Product Specification

- Shape: Customized
- Application: Solar Energy System
- Surface Treatment: Anodized. Power Coating
- Thickness: Customized
- Length: Customized
- Width: Customized
- Oem/Odm: Available
- Feature: Lightweight And Durable
- Highlight: **Lightweight Solar Panel Aluminium Profile, Customized Thickness Solar Panel Aluminium Profile, Durable Solar Panel Aluminium Profile**

Product Description

Product Description:

The Solar Panel Aluminium Profile is a versatile and essential component for solar energy systems. Crafted from high-quality aluminum material, this profile is designed to provide durability and structural support for solar panels. Its customized shape, thickness, and width make it an ideal choice for various solar applications, ensuring a perfect fit for different system configurations.

Constructed from durable aluminum, this Solar Panel Aluminium Profile offers excellent corrosion resistance, making it suitable for outdoor use in various weather conditions. The profile's robust design provides stability and support for solar panels, ensuring optimal performance and longevity for the entire solar energy system.

With a customized shape, this Aluminium Profile can be tailored to fit specific requirements, allowing for seamless integration into different solar panel setups. Its versatility and adaptability make it an ideal choice for both residential and commercial solar projects, providing a reliable and sturdy framework for solar panels.

The Solar Panel Aluminium Profile is specially designed for solar energy systems, offering a secure and efficient mounting solution for solar panels. Its aluminum construction provides a lightweight yet strong framework that is easy to install and ensures the longevity of the solar system.

Whether for rooftop solar installations or ground-mounted solar arrays, this Aluminium Profile is an essential component that enhances the overall performance and efficiency of the solar energy system. Its customized thickness and width options allow for precise customization, ensuring a perfect fit and optimal functionality for the solar panels.

Designed to withstand the rigors of solar energy applications, this Aluminium Profile is engineered to provide reliable support and stability for solar panels. Its durable construction and customized shape make it a dependable choice for ensuring the long-term operation and efficiency of solar energy systems.

Investing in the Solar Panel Aluminium Profile is a smart choice for maximizing the performance and durability of solar energy systems. Its aluminum material offers excellent strength-to-weight ratio and corrosion resistance, ensuring a sturdy and long-lasting mounting solution for solar panels.

Whether for residential, commercial, or industrial solar projects, this Aluminium Profile is a versatile and reliable option for enhancing the structural integrity and efficiency of solar energy systems. Its customized features allow for seamless integration and precise fitting, ensuring a secure and stable support for solar panels.

Features:

Product Name: Solar Panel Aluminium Profile

Oem/Odm: Available

Thickness: Customized

Shape: Customized

Material: Aluminum

Color: Black

Technical Parameters:

Feature	Lightweight And Durable
Length	Customized
Color	Black
Application	Solar Energy System
Width	Customized
Oem/Odm	Available
Material	Aluminum
Usage	Solar Panel Frame
Surface Treatment	Anodized, Powder Coating
Shape	Customized

Applications:

The Solar Panel Aluminium Profile by Golden Chain is a high-quality product designed for various applications in the solar industry. With its durable aluminum material and sleek black color, this product is ideal for creating strong and reliable solar panel frames.

Whether you are working on a residential rooftop solar installation or a large-scale solar farm project, the Golden Chain Solar Panel Aluminium Profile offers the perfect solution. Its customized length allows for flexible design options, while the anodized surface treatment ensures long-lasting protection against environmental factors.

Manufactured in Guangdong, China, this product meets the highest standards of quality and reliability. The minimum order quantity of 300 kilograms makes it suitable for both small and large-scale projects, while the packaging details include a protective film for safe transportation.

With a delivery time of 15-30 days, you can count on timely arrival of your order. The payment terms of L/C and T/T provide flexibility and convenience for customers worldwide.

Power coating enhances the durability of the aluminium profile, making it resistant to corrosion and wear. This feature is especially

beneficial for solar panel frames, which are exposed to various weather conditions throughout their lifespan.
In conclusion, the Golden Chain Solar Panel Aluminium Profile is the perfect choice for your solar panel frame needs. Whether you are building a residential solar system or a commercial solar project, this product offers reliability, durability, and efficiency for your Aluminium Photovoltaic Mounting System.

Customization:

Product Customization Services for Solar Panel Aluminium Profile: -----
Brand Name: Golden Chain
Place of Origin: Guangdong, China
Minimum Order Quantity: 300 Kilograms
Packaging Details: Protect film
Delivery Time: 15-30 days
Payment Terms: L/C, T/T
Usage: Solar Panel Frame
OEM/ODM: Available
Thickness: Customized
Color: Black
Feature: Lightweight And Durable

Packing and Shipping:

Product Packaging: -----
The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery.
Shipping:
Ocean, Air, Express
