

Lightweight And Durable Photovoltaic Aluminum Profile With Power Coating Long-lasting

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300 Kilogram
- Packaging Details: protect film
- Delivery Time: 15-30 days
- Payment Terms: L/C, T/T

Product Specification

- Feature: Lightweight And Durable
- Shape: Customized
- Surface Treatment: Anodized. Power Coating
- Length: Customized
- Application: Solar Energy System
- Oem/Odm: Available
- Width: Customized
- Usage: Solar Panel Frame
- Highlight: **Durable Photovoltaic Aluminum Profile,
Lightweight Photovoltaic Aluminum Profile,
Long Lasting Photovoltaic Aluminum Profile**

Product Description

Product Description:

The Solar Panel Aluminium Profile is a versatile and essential component for photovoltaic systems. It is designed to provide structural support and protection for solar panels, ensuring the efficient and reliable operation of the photovoltaic setup.

With a customizable width and thickness, this aluminium profile can be tailored to meet the specific requirements of various solar panel installations. The flexibility in dimensions allows for a precise fit and optimal performance, contributing to the overall effectiveness of the photovoltaic system.

Furthermore, the Solar Panel Aluminium Profile offers OEM/ODM options, providing the opportunity for customization and personalization according to individual project needs. This feature allows for greater adaptability and ensures that the aluminium profile aligns perfectly with the design and specifications of the photovoltaic installation.

The black color of the aluminium profile not only adds a sleek and modern aesthetic to the solar panel structure but also serves a functional purpose. The black color enhances heat absorption, which can be beneficial for certain photovoltaic setups, especially in colder climates where maximizing energy production is crucial.

In addition to its customizable width, thickness, and color, the Solar Panel Aluminium Profile can also be adjusted in length to suit specific project requirements. The ability to customize the length of the aluminium profile ensures a seamless integration with the solar panels, contributing to the overall efficiency and performance of the photovoltaic system.

Constructed with high-quality materials and precision engineering, the Solar Panel Aluminium Profile is built to withstand the demanding conditions of photovoltaic installations. The durable construction ensures long-lasting performance and reliable support for the solar panels, even in challenging environments.

One of the key features of the Solar Panel Aluminium Profile is its power coating finish. The power coating not only provides a protective layer against environmental factors such as corrosion and UV exposure but also enhances the overall durability and lifespan of the aluminium profile. This coating ensures that the aluminium profile maintains its integrity and appearance over an extended period, contributing to the longevity of the photovoltaic system.

Overall, the Solar Panel Aluminium Profile offers a combination of customization, durability, and functionality, making it an essential component for photovoltaic installations. With its customizable dimensions, OEM/ODM options, black color, and power coating finish, this aluminium profile provides the structural support and protection necessary for the efficient operation of solar panels in various settings.

Features:

Product Name: Solar Panel Aluminium Profile

Length: Customized

Surface Treatment: Anodized, Power Coating

Color: Black

Material: Aluminum

Thickness: Customized

Technical Parameters:

Application	Solar Energy System
Color	Black
Material	Aluminum
Length	Customized
Width	Customized
Surface Treatment	Anodized, Power Coating
Thickness	Customized
Feature	Lightweight And Durable
Usage	Solar Panel Frame
Shape	Customized

Applications:

The Solar Panel Aluminium Profile by Golden Chain is a versatile product suitable for various Product Application Occasions and Scenarios. This high-quality aluminium profile is designed specifically for photovoltaic applications, making it ideal for solar panel installations.

Originating from Guangdong, China, this product boasts a minimum order quantity of 300 kilograms. Each profile is carefully packaged with protective film to ensure its integrity during transportation. With a delivery time ranging from 15 to 30 days, customers can rely on prompt service from Golden Chain.

The lightweight and durable nature of this aluminium profile makes it perfect for a range of applications. Whether used for residential, commercial, or industrial solar projects, the product's durability ensures long-lasting performance.

Available in a sleek black color, the Solar Panel Aluminium Profile can be customized in terms of length and width to suit specific project requirements. The surface treatment of the profile includes anodized power coating, providing both aesthetic appeal and protection against environmental elements.

Customers can enjoy flexible payment terms such as L/C and T/T, adding convenience to the purchasing process. With its versatility, durability, and customizable features, the Solar Panel Aluminium Profile by Golden Chain is a top choice for various photovoltaic applications.

Customization:

Product Customization Services for the Solar Panel Aluminium Profile:

Brand Name: Golden Chain
Place of Origin: Guangdong, China
Minimum Order Quantity: 300 Kilograms
Packaging Details: Protect film
Delivery Time: 15-30 days
Payment Terms: L/C, T/T
Color: Black
Length: Customized
Thickness: Customized
Usage: Solar Panel Frame
OEM/ODM: Available

Packing and Shipping:

Product Packaging:

The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery.

Shipping:

Ocean, Air, Express
