

Power Coating Photovoltaic Aluminium Profile In Black Color

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300 Kilogram
- Packaging Details: protect film
- Delivery Time: 15-30 days
- Payment Terms: L/C, T/T

Product Specification

- Shape: Customized
- Usage: Solar Panel Frame
- Color: Black
- Width: Customized
- Application: Solar Energy System
- Feature: Lightweight And Durable
- Thickness: Customized
- Length: Customized
- Highlight: **Power Coating Photovoltaic Aluminium Profile, Black Color Photovoltaic Aluminium Profile**

Product Description

Product Description:

The Solar Panel Aluminium Profile is an essential component for the installation and support of photovoltaic solar panels. Customized in shape and thickness, this aluminium profile is designed specifically for use in Solar Energy Systems. Its lightweight and durable features make it an ideal choice for supporting solar panels in various settings.

Manufactured with high-quality aluminum, this profile offers both strength and corrosion resistance, ensuring longevity and reliability in outdoor solar applications. The customized shape allows for a perfect fit with different panel designs, providing flexibility in installation. The adjustable thickness also adds to the versatility of this profile, accommodating various panel weights and sizes.

One of the key advantages of the Solar Panel Aluminium Profile is its compatibility with photovoltaic systems, making it an excellent choice for harnessing solar energy. The profile's design enhances the efficiency of solar panels by providing a stable and secure mounting structure, optimizing their exposure to sunlight for maximum energy production.

Furthermore, the lightweight nature of the aluminium profile makes the installation process easier and more efficient, reducing overall project time and labor costs. Its durable construction ensures that it can withstand environmental factors such as wind, rain, and snow, providing a reliable support system for solar panels in diverse climates.

For businesses looking to customize their solar energy installations, the OEM/ODM options available for this aluminium profile offer the flexibility to meet specific project requirements. Whether it's a unique panel layout or a specialized mounting configuration, the customization options ensure a tailored solution for each solar energy system.

In summary, the Solar Panel Aluminium Profile is a versatile and reliable component for supporting photovoltaic solar panels in various applications. Its customized shape and thickness, along with its lightweight and durable features, make it an ideal choice for enhancing the efficiency and longevity of solar energy systems. With OEM/ODM options available, businesses can create customized solutions that meet their specific needs, further highlighting the flexibility and adaptability of this aluminium profile.

Features:

Product Name: Solar-Panel Aluminium Profile

Usage: Aluminium Photovoltaic Mounting System

Length: Customized

Application: Solar Energy System

Shape: Customized

Color: Black

Technical Parameters:

Oem/Odm	Available
Color	Black
Thickness	Customized
Width	Customized
Shape	Customized
Material	Aluminum
Application	Solar Energy System
Surface Treatment	Anodized, Power Coating
Length	Customized
Feature	Lightweight And Durable

Applications:

The Solar Panel Aluminium Profile by Golden Chain is a versatile product suitable for a variety of application occasions and scenarios in the solar energy industry. Made in Guangdong, China, this product is designed to meet the specific requirements of the solar energy system.

With its lightweight and durable features, the Aluminium Profile is ideal for use in Aluminium Photovoltaic Mounting Systems. The customized shape and black color of the profile make it a perfect fit for solar panel frames. The power coating adds an extra layer of protection, ensuring longevity and resistance to environmental factors.

Whether you are working on a large-scale solar energy project or a residential installation, the Solar Panel Aluminium Profile offers reliability and efficiency. The minimum order quantity of 300 kilograms allows for flexibility in project size, while the packaging details include a protective film to prevent any damage during shipping.

When you choose Golden Chain's Aluminium Profile, you can expect a delivery time of 15-30 days, depending on your location. The payment terms offered include L/C and T/T, providing convenience and security for your transactions.

In conclusion, the Solar Panel Aluminium Profile is a must-have component for anyone in the solar energy industry looking for a high-quality, customizable solution. Its versatility, durability, and sleek design make it a top choice for various applications in solar energy systems.

Customization:

Product Customization Services for the Solar Panel Aluminium Profile:
Brand Name: Golden Chain
Place of Origin: Guangdong, China
Minimum Order Quantity: 300 Kilogram
Packaging Details: protect film
Delivery Time: 15-30 days
Payment Terms: L/C, T/T
Width: Customized
Application: Solar Energy System
Feature: Lightweight And Durable
Color: Black
Thickness: Customized

Packing and Shipping:

Product Packaging:
The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery. Each profile is wrapped in protective material and placed in a sturdy cardboard box with ample cushioning to prevent any damage during transit.
Shipping:
Ocean, Air, Express
