## Product Description

### Product Description:

With its high durability, the LED Aluminum Profile provides long-lasting performance, making it a reliable option for both residential and commercial lighting projects. The corrosion resistance of the aluminum material ensures that the profile can withstand harsh environmental conditions, making it suitable for indoor and outdoor use.

One of the key features of the LED Aluminum Profile is its customizable surface treatment. This allows customers to choose the finish that best suits their design requirements, whether it be a sleek metallic look or a powder-coated color option. The customizable surface treatment also enhances the overall aesthetics of the profile, making it a stylish addition to any lighting setup.

Additionally, the thickness of the LED Aluminum Profile is customizable, providing flexibility in design and installation. Whether you require a thinner profile for a minimalist look or a thicker profile for added durability, the customizable thickness ensures that the product can meet your specific needs.

Overall, the LED Aluminum Profile is a reliable and versatile solution for the lighting industry, offering high durability, corrosion resistance, and customizable features. When paired with strip lights, this profile can create stunning lighting effects for various applications, making it a popular choice among lighting professionals and enthusiasts alike.

### Features:

Product Name: LED Aluminum Profile

Surface Treatment: Customized

Length: Customizable

Color: Customized

Thickness: Customizable

Corrosion Resistance: Yes

### Technical Parameters:

Installation Type	Surface Mount
Heat Dissipation	Efficient
Durability	High
Width	Customizable
Material	Aluminum
Length	Customizable
Shape	Customized
Color	Customized
Corrosion Resistance	Yes
Surface Treatment	Customized

### Applications:

LED Aluminum Profile by No Brand is a versatile product that can be used in a variety of scenarios due to its durable aluminum construction and customizable features.

One of the key application occasions for this product is in educational settings where LED lighting is required. The aluminum profile provides a sleek and modern look while also offering corrosion resistance, making it ideal for long-term use in schools, colleges, and other educational institutions.

Due to its customizable thickness and width, this LED aluminum profile can be tailored to fit different lighting requirements in educational environments. Whether it's for classroom lighting, library illumination, or hallway lights, this product can be adapted to suit various needs. Furthermore, the color customization option allows the LED aluminum profile to blend seamlessly with the existing decor and color schemes of educational facilities, creating a cohesive and aesthetically pleasing environment.

Manufactured in Guangdong, China, this product has a minimum order quantity of 300 kilograms and comes packaged in cartons for convenient transportation and storage. With a delivery time of 15-30 days, customers can expect timely fulfillment of their orders.

Payment terms for the LED Aluminum Profile include L/C and T/T, providing flexibility and convenience for buyers. The use of high-quality aluminum material ensures durability and reliability, making this product a cost-effective lighting solution for educational institutions.
