

Customized Width Power Coating Aluminum Profile For Superior And Consistent Coating Performance

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300 Kilogram
- Packaging Details: protect film
- Delivery Time: 15-30 days
- Payment Terms: L/C, T/T

Product Specification

- Thickness: Customized
- Length: Customized
- Usage: Solar Panel Frame
- Width: Customized
- Color: Black
- Application: Solar Energy System
- Feature: Lightweight And Durable
- Material: Aluminum
- Highlight: **Power Coating Aluminum Profile, Customized Length Aluminum Profile, Consistent Coating Aluminum Profile**

Product Description

Product Description:

The Solar Panel Aluminium Profile is a crucial component for the construction of photovoltaic solar panel frames. These profiles are specifically designed to provide sturdy support and structural integrity to the solar panels, ensuring optimal performance and longevity of the solar energy system.

With a customized width, the Solar Panel Aluminium Profile can be tailored to meet the specific requirements of different solar panel sizes and configurations. This versatility allows for seamless integration and compatibility with various photovoltaic systems.

The Surface Treatment of the Aluminium Profile includes both Anodized and Power Coating finishes. The anodized coating enhances the corrosion resistance of the profile, making it suitable for outdoor applications where exposure to environmental elements is common. The power coating provides an additional layer of protection while also offering a visually appealing finish.

Designed for use in Solar Energy Systems, the Solar Panel Aluminium Profile is an essential component in the construction of reliable and efficient solar panel mounting structures. The profile ensures proper alignment and support for the solar panels, maximizing their exposure to sunlight and enhancing overall energy production.

Available for OEM and ODM customization, the Solar Panel Aluminium Profile offers flexibility for manufacturers and installers to create tailored solutions that meet specific project requirements. This customization option enables the seamless integration of the profile into different solar panel systems, ensuring a precise fit and optimal performance.

In conclusion, the Solar Panel Aluminium Profile is a high-quality and versatile component designed for use in photovoltaic systems. Its customized width, durable surface treatment, and compatibility with solar energy applications make it an ideal choice for constructing reliable and efficient solar panel mounting structures. With OEM and ODM options available, this profile offers flexibility and customization to meet the unique needs of various solar energy projects.

Features:

Product Name: Solar Panel Aluminium Profile

Material: Aluminum

Usage: Solar Panel Frame

Thickness: Customized

Length: Customized

Feature: Lightweight And Durable

Technical Parameters:

Shape	Customized
Usage	Solar Panel Frame
Width	Customized
Application	Solar Energy System
Oem/Odm	Available
Thickness	Customized
Feature	Lightweight And Durable
Material	Aluminum
Color	Black
Length	Customized

Applications:

The Golden Chain Solar Panel Aluminium Profile is a high-quality product originating from Guangdong, China. With a minimum order quantity of 300 kilograms, these aluminium profiles are ideal for various applications in the solar energy system sector.

The Aluminium Photovoltaic Mounting System is a crucial component in the solar panel industry, and the Golden Chain profiles are designed to meet the specific requirements of this application. Made from durable aluminum material, these profiles are customizable in terms of thickness and length to suit different solar panel frame designs.

Whether you are setting up a residential solar energy system or a large-scale commercial project, the Golden Chain Solar Panel Aluminium Profile offers reliability and efficiency. The packaging details include a protective film to ensure that the profiles reach you in perfect condition.

With a delivery time of 15-30 days, you can trust that your orders will be fulfilled in a timely manner. The flexible payment terms of L/C and T/T make the purchasing process convenient for customers.

These aluminium profiles are versatile and can be used in a variety of solar panel applications, making them a valuable choice for those in the solar energy industry. Enhance the performance and durability of your solar panels with the Golden Chain Aluminium Profile.

Customization:

Product Customization Services for the Solar Panel Aluminium Profile:

Brand Name: Golden Chain
Place of Origin: Guangdong, China
Minimum Order Quantity: 300 Kilogram
Packaging Details: Protect film
Delivery Time: 15-30 days
Payment Terms: L/C, T/T
Thickness: Customized
Shape: Customized
Width: Customized
OEM/ODM: Available
Feature: Lightweight And Durable

Packing and Shipping:

Product Packaging:
The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery.
Shipping:
Ocean, Air, Express
