Product Description

Product Description:

The LED Aluminum Profile is a versatile lighting solution that offers customizable options to fit your specific needs. With a focus on flexibility and quality, this product is perfect for a wide range of applications, including LED wall washer installations, educational LED lighting projects, and more.

One of the key features of this LED Aluminum Profile is its customizable length, allowing you to tailor the lighting to your exact specifications. Whether you need a long continuous strip of light or shorter segments for specific areas, this product can be customized to suit your project perfectly.

For installation, the LED Aluminum Profile is designed for surface mount applications, making it easy to install on various surfaces such as walls, ceilings, or furniture. This installation type provides a secure and stable mounting solution, ensuring that your lights stay in place for long-lasting performance.

Another standout feature of this product is its customizable shape, allowing you to create unique lighting designs that match your aesthetic preferences. Whether you prefer straight lines, curves, or custom patterns, the LED Aluminum Profile can be shaped to bring your vision to life.

In addition to its customizable length and shape, the LED Aluminum Profile also offers customizable width options. This flexibility allows you to achieve the desired lighting coverage for your space, whether you need a narrow beam of light or a wider spread for ambient illumination.

When it comes to color options, the LED Aluminum Profile provides a wide range of choices to match your design scheme. Whether you're looking for a warm white light for a cozy atmosphere, a cool white light for a modern look, or a custom color to create a specific ambiance, this product has you covered.

Overall, the LED Aluminum Profile is a versatile and customizable lighting solution that is ideal for a variety of applications, including LED wall washer installations and educational LED lighting projects. With its customizable length, shape, width, and color options, this product offers the flexibility and quality you need to achieve your desired lighting design.

Features:

Product Name: LED Aluminum Profile

Application: Lighting Industry

Color: Customized

| Durability | High |
| Application | Lighting Industry |
| Thickness | Customizable |
| Corrosion Resistance | Yes |
| Material | Aluminum 6063 |
| Installation Type | Surface Mount |
| Heat Dissipation | Efficient |
| Surface Treatment | Customized |
| Color | Customized |
| Width | Customizable |

Applications:

LED Aluminum Profile is a versatile product suitable for a wide range of application occasions and scenarios due to its durable aluminum construction and customizable features. Whether for residential, commercial, or industrial use, this product from No Brand, originating from Guangdong, China, offers a high-quality solution for various lighting needs.

One of the key application areas for LED Aluminum Profile is in the education sector, specifically in the installation of education LED lights. These profiles can be customized in width, length, and thickness to fit the specific requirements of classrooms, lecture halls, and educational facilities. The surface mount installation type makes it easy to integrate these profiles into existing lighting systems, providing a seamless and modern look.

With a minimum order quantity of 300 kilograms and packaging details in cartons, LED Aluminum Profile is suitable for educational institutions looking to upgrade their lighting systems. The customizable color options allow schools and universities to match the lighting profiles with their branding or create a conducive learning environment with appropriate lighting ambiance.

Whether you are looking to illuminate a school library, laboratory, or auditorium, LED Aluminum Profile offers a reliable solution with a delivery time of 15-30 days. The flexible payment terms of L/C and T/T make it convenient for educational institutions to procure these profiles for their lighting projects.

In conclusion, LED Aluminum Profile is a valuable product for the education sector, providing customizable, durable, and efficient lighting

solutions for various application occasions. Its versatility, high-quality construction, and customizable features make it an ideal choice for education LED light installations in schools, colleges, and universities.
