Product Description

Product Description:

Introducing our versatile LED Aluminum Profile, the perfect solution for creating customized lighting solutions in a variety of settings. With a range of customizable features, this product offers flexibility and quality for a diverse range of applications.

One of the standout features of our LED Aluminum Profile is its customizable width, allowing you to tailor the profile to your specific needs. Whether you require a narrow or wide profile, this product can be adjusted to fit your requirements precisely.

Another key attribute of the LED Aluminum Profile is its surface treatment, which can be fully customized to suit your design preferences. This flexibility enables you to create a cohesive look that complements the surrounding environment, making this profile ideal for a wide range of projects.

Color customization is another highlight of this product, providing you with the opportunity to match the LED Aluminum Profile to your desired color scheme. Whether you prefer a sleek silver finish or a bold pop of color, the choice is yours with this customizable feature. In addition to width, surface treatment, and color, the thickness of the LED Aluminum Profile is also customizable. This allows you to select the appropriate thickness for your specific application, ensuring that the profile meets your performance and aesthetic requirements.

Made from high-quality Aluminum 6063, our LED Aluminum Profile combines durability with a sleek and modern design. This material is known for its excellent strength-to-weight ratio, corrosion resistance, and versatility, making it an ideal choice for a wide range of lighting projects.

Whether you are looking to enhance the lighting in a commercial space, create a stunning display in a retail setting, or illuminate an educational environment with education LED lights, the LED Aluminum Profile offers the flexibility and quality you need. Its customizable features make it a versatile choice for a variety of applications, ensuring that your lighting design is both functional and visually appealing. For projects that require a dynamic and eye-catching lighting solution, the LED Aluminum Profile is also compatible with LED wall washer lights. This combination allows you to create stunning lighting effects that can transform any space into a captivating and inviting environment.

In summary, our LED Aluminum Profile is a top-quality product that offers a range of customizable features to meet your specific lighting needs. With its customizable width, surface treatment, color, thickness, and high-quality Aluminum 6063 material, this profile is the perfect choice for creating customized lighting solutions in a variety of settings. Whether you are working on a commercial, retail, or educational project, the LED Aluminum Profile provides the flexibility and quality you need to bring your lighting design ideas to life.

Features:

Product Name: LED Aluminum Profile

Durability: High

Corrosion Resistance: Yes

Material: Aluminum 6063

Application: Lighting Industry

Color: Customized

Technical Parameters:

Installation Type	Surface Mount
Heat Dissipation	Efficient
Application	Lighting Industry
Width	Customizable
Length	Customizable
Thickness	Customizable
Durability	High
Shape	Customized
Material	Aluminum 6063
Surface Treatment	Customized

Applications:

LED Aluminum Profile is a versatile product that finds its application in a variety of scenarios within the lighting industry. With its efficient heat dissipation capabilities, customizable thickness, shape, and length options, this product is a popular choice for various lighting solutions.

One of the primary application occasions for LED Aluminum Profile is in strip light installations. The profile provides a sturdy and heat-dissipating housing for strip lights, ensuring optimal performance and longevity. Whether used in residential, commercial, or industrial settings, the LED Aluminum Profile enhances the functionality and aesthetics of strip light setups.

Due to its customizable features, the LED Aluminum Profile is suitable for a wide range of scenarios. From accent lighting in retail displays to ambient lighting in architectural settings, this product adapts to different requirements with ease. Its ability to be tailored in terms of thickness, shape, and length allows for seamless integration into various lighting designs.

Manufactured in Guangdong, China, with a minimum order quantity of 300 kilograms, the LED Aluminum Profile is packaged securely in

cartons for delivery. Customers can expect their orders to be fulfilled within 15-30 days, with payment terms including L/C and T/T for convenience.

In conclusion, the LED Aluminum Profile is a reliable and customizable solution for strip light applications in the lighting industry. Its efficient heat dissipation, along with the flexibility in design options, make it a preferred choice for lighting professionals and enthusiasts alike.
