

Black Power Coating Aluminium Profile for Solar Energy System Top Performance

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300 Kilogram
- Packaging Details: protect film
- Delivery Time: 15-30 days
- Payment Terms: L/C, T/T

Product Specification

- Length: Customized
- Feature: Lightweight And Durable
- Material: Aluminum
- Thickness: Customized
- Surface Treatment: Power Coating
- Width: Customized
- Color: Black
- Shape: Customized
- Highlight: **Black Power Coating Solar Energy Aluminium Profile**
,
Customized Thickness Power Coating Aluminium Profile

Product Description

Product Description:

The Solar Panel Aluminium Profile is an essential component for solar energy systems, specifically designed for constructing durable and reliable solar panel frames. Crafted from high-quality aluminum material, this profile ensures longevity and strength to support solar panels efficiently.

With a focus on providing a reliable solution for solar energy applications, this aluminium profile is ideal for enhancing the performance and lifespan of photovoltaic systems. The black color of the profile adds a sleek and modern touch to the overall appearance of the solar panel frame.

One of the key features of this Solar Panel Aluminium Profile is its customized length, allowing for flexibility and adaptability based on specific project requirements. Whether for residential, commercial, or industrial solar energy systems, the ability to customize the length ensures a perfect fit and seamless integration.

Furthermore, the aluminium material used in this profile offers excellent corrosion resistance, making it suitable for outdoor use in various environmental conditions. This durability is essential for maintaining the structural integrity of the solar panel frame over time, ensuring optimal performance.

The profile also undergoes a power coating process, enhancing its surface finish and providing additional protection against wear and tear. This coating not only adds to the aesthetic appeal of the profile but also contributes to its overall durability and resistance to environmental factors.

When it comes to solar panel frames, the choice of materials and construction play a crucial role in the efficiency and longevity of the system. The use of high-quality aluminium profiles such as this one ensures that the solar panels are securely mounted and well-supported, maximizing their energy output and overall performance.

Whether you are installing a new solar energy system or upgrading an existing one, the Solar Panel Aluminium Profile is a reliable and cost-effective solution that offers both functionality and aesthetics. Its black color complements the solar panels while providing a professional and sleek look to the overall setup.

In conclusion, the Solar Panel Aluminium Profile is a versatile and durable component that is specifically designed for solar energy systems. With its customized length, aluminum material, black color, and power coating finish, this profile offers the perfect blend of functionality and aesthetics for constructing efficient and reliable solar panel frames.

Features:

Product Name: Solar Panel Aluminium Profile

Application: Solar Energy System

Shape: Customized

Material: Aluminum

Oem/Odm: Available

Thickness: Customized

Technical Parameters:

Width	Customized
Feature	Lightweight And Durable
Surface Treatment	Power Coating
Length	Customized
Material	Aluminum
Oem/Odm	Available
Color	Black
Usage	Solar Panel Frame
Shape	Customized
Application	Solar Energy System

Applications:

Golden Chain Solar Panel Aluminium Profile is a high-quality product originating from Guangdong, China. Designed with power coating surface treatment, this aluminum profile is ideal for various application occasions and scenarios related to solar energy systems.

With the flexibility of customized length and shape, the Golden Chain Solar Panel Aluminium Profile can be tailored to fit different solar panel frame requirements. Whether for residential, commercial, or industrial solar energy projects, this product offers durability and reliability.

The minimum order quantity for the Golden Chain Solar Panel Aluminium Profile is 300 kilograms, and it is carefully packaged with protective film to ensure its condition during transportation. Customers can expect a delivery time of 15-30 days, with payment terms available in L/C and T/T.

Considering its power coating surface treatment, this aluminum profile is resistant to corrosion, making it suitable for both indoor and outdoor solar panel installations. Its versatility in application and usage makes it a preferred choice for professionals in the solar energy industry.

Whether you are constructing a new solar energy system or replacing existing solar panel frames, the Golden Chain Solar Panel Aluminium Profile offers the necessary support and structural integrity. Trust in this product to enhance the performance and longevity of your solar panel setup.

Customization:

Product Customization Services for the Solar Panel Aluminum Profile:

Brand Name: Golden Chain
Place of Origin: Guangdong, China
Minimum Order Quantity: 300 Kilogram
Packaging Details: Protect film
Delivery Time: 15-30 days
Payment Terms: L/C, T/T
Application: Solar Energy System
Usage: Solar Panel Frame
Thickness: Customized
Color: Black
Width: Customized

Packing and Shipping:

Product Packaging:
The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery.
Shipping:
Ocean, Air, Express
