

## Power Coating Solar Panel Frame Aluminum Profile Customized Width

Our Product Introduction

for more products please visit us on [alu-heatsink.com](http://alu-heatsink.com)

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300 Kilogram
- Packaging Details: protect film
- Delivery Time: 15-30 days
- Payment Terms: L/C, T/T

### Product Specification

- Material: Aluminum
- Width: Customized
- Shape: Customized
- Color: Black
- Usage: Solar Panel Frame
- Application: Solar Energy System
- Oem/Odm: Available
- Length: Customized
- Highlight: **Power Coating Aluminum Profile,  
Durable Solar Panel Frame Aluminum Profile,  
Customized Width Aluminum Profile**

## Product Description

### Product Description:

The Solar Panel Aluminium Profile is an essential component for constructing sturdy and reliable solar panel frames. Made from high-quality aluminum, this profile offers a perfect combination of strength and lightweight design. Its durable construction ensures long-lasting performance, making it an ideal choice for solar panel installations.

The key feature of this aluminium profile is its lightweight yet durable nature. This allows for easy handling and installation while providing the necessary support for the solar panels. The use of aluminum as the primary material ensures corrosion resistance and structural integrity, making it suitable for outdoor use in various weather conditions.

Designed specifically for solar panel frames, this aluminium profile offers a seamless fit and compatibility with different mounting systems. Its versatility and adaptability make it a popular choice among installers and contractors looking for reliable solar panel framing solutions.

One of the standout qualities of this aluminium profile is its surface treatment with power coating. This advanced coating technique provides a sleek and uniform finish to the profile, enhancing its aesthetics and durability. The power coating not only adds a layer of protection against environmental factors but also contributes to the overall longevity of the profile.

The black color of the aluminium profile adds a modern and sophisticated touch to the solar panel frame, blending seamlessly with the panels and enhancing the overall visual appeal of the installation. The black finish also helps in heat absorption, optimizing the performance of the solar panels.

Whether you are setting up a residential solar energy system or a large-scale solar power plant, the Solar Panel Aluminium Profile is an indispensable component for ensuring the structural integrity and longevity of the installation. Its compatibility with different mounting systems and ease of installation make it a preferred choice for solar panel frame construction.

Investing in a high-quality aluminium profile for your solar panel frames is essential for maximizing the efficiency and durability of your solar energy system. The lightweight design, durability, and power coating surface treatment of this profile ensure that your solar panels are securely mounted and well-protected for years to come.

Choose the Solar Panel Aluminium Profile for your next solar panel installation project and experience the benefits of a reliable and long-lasting mounting solution. Its superior quality, lightweight construction, and power coating surface treatment make it an excellent choice for both residential and commercial solar applications.

### Features:

Product Name: Solar-Panel Aluminium Profile

Shape: Customized

Length: Customized

Surface Treatment: Power Coating

Application: Solar Energy System

Material: Aluminum

### Technical Parameters:

Oem/Odm	Available
Thickness	Customized
Surface Treatment	Power Coating
Application	Solar Energy System
Length	Customized
Color	Black
Usage	Solar Panel Frame
Shape	Customized
Width	Customized
Material	Aluminum

### Applications:

The Solar Panel Aluminium Profile by Golden Chain is a versatile product suitable for a wide range of applications and scenarios. Its durable construction and power coating surface treatment make it ideal for use in the solar energy industry. Whether you are working on residential, commercial, or industrial solar panel installations, this product offers the strength and reliability needed to support solar panels effectively.

With its customizable width and thickness, the Solar Panel Aluminium Profile can be tailored to meet your specific project requirements. The sleek black color adds a modern touch to the overall solar panel system design, enhancing its visual appeal.

Originating from Guangdong, China, this product reflects the quality craftsmanship and attention to detail synonymous with Chinese manufacturing. The minimum order quantity of 300 kilograms ensures that you have an ample supply of aluminium profiles for your solar panel projects. The packaging details include protective film to safeguard the product during transportation and storage.

When it comes to delivery, the Solar Panel Aluminium Profile offers a quick turnaround time of 15-30 days, allowing you to stay on schedule with your project timelines. The available payment terms of L/C and T/T provide flexibility and convenience for your purchasing needs.

Additionally, the OEM/ODM services offered by Golden Chain enable you to customize the aluminium profiles further to meet unique project specifications. This flexibility ensures that you can achieve the desired outcome for your solar panel installations.

**Customization:**

Product Customization Services for the Solar Panel Aluminum Profile: -----  
Brand Name: Golden Chain  
Place of Origin: Guangdong, China  
Minimum Order Quantity: 300 Kilogram  
Packaging Details: Protect film  
Delivery Time: 15-30 days  
Payment Terms: L/C, T/T  
Color: Black  
Shape: Customized  
Surface Treatment: Power Coating  
Usage: Solar Panel Frame  
Length: Customized

**Packing and Shipping:**

Product Packaging:  
The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery.  
Shipping:  
Ocean, Air, Express
