

Customized Length Solar Panel Aluminium Profile for Lightweight And Durable Design

Our Product Introduction

for more products please visit us on alu-heatsink.com

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Golden Chain
- Minimum Order Quantity: 300 Kilogram
- Packaging Details: protect film
- Delivery Time: 15-30 days
- Payment Terms: L/C, T/T

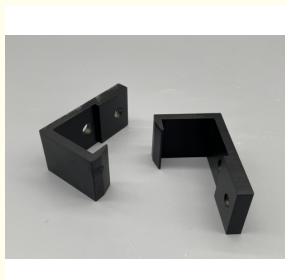

Product Specification

- Oem/Odm: Available
- Color: Black, Orange
- Length: Customized
- Application: Solar Energy System
- Thickness: Customized
- Surface Treatment: Power Coating
- Shape: Customized
- Material: Aluminum
- Highlight: **Customized Length Solar Panel Aluminium Profile**
, Lightweight Solar Panel Aluminium Profile,
Durable Solar Panel Aluminium Profile

Product Description

Product Description:

The Solar Panel Aluminium Profile is a versatile and durable product designed for use in photovoltaic systems. With OEM and ODM options available, this profile can be customized to meet specific project requirements, making it a highly adaptable solution for various solar panel installations.

Constructed from high-quality aluminum, this profile offers excellent strength and corrosion resistance, ensuring long-term reliability in outdoor environments. The use of aluminum also makes it lightweight, easy to handle, and ideal for supporting photovoltaic panels effectively.

The width of the Solar Panel Aluminium Profile is fully customizable, allowing for seamless integration with different solar panel sizes and configurations. This flexibility ensures a precise fit and optimal performance for the overall photovoltaic system.

Available in classic black or vibrant orange colors, this profile not only provides functional support but also adds a touch of visual appeal to the solar panel installation. The choice of colors allows for customization to match the aesthetic preferences or branding requirements of the project.

With a customizable length, the Solar Panel Aluminium Profile can be tailored to suit the specific dimensions of the solar panel array. This feature enables efficient use of space and ensures a secure and stable mounting system for the photovoltaic panels.

The use of aluminum in the construction of this profile offers several advantages for solar panel installations. Aluminum is a highly conductive material, allowing for efficient heat dissipation and promoting the overall performance of the photovoltaic system. Additionally, aluminum is non-magnetic, making it safe to use in close proximity to sensitive electronic components.

Designed to meet the demands of solar energy applications, the Solar Panel Aluminium Profile is a reliable and cost-effective solution for mounting photovoltaic panels. Its durable construction, customizable dimensions, and attractive color options make it an ideal choice for both residential and commercial solar projects.

Whether used in rooftop solar installations, ground-mounted arrays, or other solar energy systems, this profile provides the structural support needed to secure and align photovoltaic panels for maximum sunlight exposure. Its versatility and ease of customization make it a valuable component in creating efficient and sustainable solar power generation systems.

In summary, the Solar Panel Aluminium Profile is a high-quality product that offers OEM and ODM options, customizable width and length, aluminum construction, and black or orange color choices. Its versatility and durability make it an excellent choice for mounting photovoltaic panels in various solar energy applications.

Features:

Product Name: Solar Panel Aluminium Profile

Width: Customized

Oem/Odm: Available

Material: Aluminum

Shape: Customized

Surface Treatment: Power Coating

Technical Parameters:

Width	Customized
Length	Customized
Usage	Solar Panel Frame
Surface Treatment	Power Coating
Color	Black, Orange
Oem/Odm	Available
Feature	Lightweight And Durable
Shape	Customized
Material	Aluminum
Thickness	Customized

Applications:

The Solar Panel Aluminium Profile by Golden Chain is a versatile product designed for the specific application of Aluminium Photovoltaic Mounting Systems in solar energy projects. Manufactured in Guangdong, China, this high-quality aluminum profile is lightweight yet durable, making it ideal for various solar panel installation scenarios.

With a minimum order quantity of 300 kilograms and customizable lengths, the Golden Chain Solar Panel Aluminium Profile is suitable for both small-scale residential solar setups and large commercial solar farms. The product is packaged with protective film to ensure it reaches customers in perfect condition.

Customers can expect a delivery time of 15-30 days, with flexible payment terms such as L/C and T/T available. The option for OEM/ODM services further enhances the product's appeal, allowing for tailored solutions to meet specific project requirements.

Whether you are setting up a new solar energy system or expanding an existing one, the Golden Chain Solar Panel Aluminium Profile offers a reliable and efficient solution. Its durable construction ensures long-lasting performance in various environmental conditions,

making it a cost-effective choice for solar panel installations.
Choose the Golden Chain Solar Panel Aluminium Profile for your next solar project and experience the benefits of a high-quality aluminum profile that is specifically designed for the solar industry.

Customization:

- Product Customization Services for Solar Panel Aluminium Profile: -----
- Brand Name: Golden Chain
 - Place of Origin: Guangdong, China
 - Minimum Order Quantity: 300 Kilograms
 - Packaging Details: Protect film
 - Delivery Time: 15-30 days
 - Payment Terms: L/C, T/T
 - Color: Black, Orange
 - Surface Treatment: Power Coating
 - Length: Customized
 - Thickness: Customized
 - OEM/ODM: Available

Packing and Shipping:

Product Packaging: -----
The Solar Photovoltaic Panels Frame Alu Profile is carefully packaged to ensure safe delivery.
Shipping:
Ocean, Air, Express
