

Universal Compatibility LED Lighting 6063 Alloy for Long-Lasting Performance

Our Product Introduction

Basic Information

- Place of Origin: China, Guangdong
- Packaging Details: protect film
- Delivery Time: 15-30days
- Payment Terms: L/C, T/T

Product Specification

- Sample Leadtime: 15 Days
- Thermal Conductivity: High
- Dimensions: Various Sizes Available
- Alloy: 6063
- Surface Treatmentment: Anodized, Customized
- Mounting Type: Vertical
- Sample: Available
- Durability: High
- Highlight: **Universal LED lighting heatsink,
6063 alloy aluminum heatsink,
Long-lasting LED heatsink performance**

Product Description

Product Description:

The Aluminum Heatsink is an essential component for effective heat dissipation in a variety of applications, including power stations, electronic devices, and more. Crafted from high-quality 6063 aluminum alloy, this heatsink offers superior durability and thermal performance. With various sizes available, it can accommodate a range of devices and configurations.

Designed for vertical mounting, this Aluminum Heatsink is versatile and can be easily integrated into different setups. Its universal compatibility makes it suitable for a wide range of devices, ensuring efficient heat management across various applications. When it comes to heat dissipation, the Aluminum Heatsink excels in providing a reliable solution for thermal management. Its high durability ensures long-lasting performance, making it a cost-effective and efficient choice for maintaining optimal operating temperatures. Whether you are looking to enhance the cooling efficiency of your power station or electronic device, the Aluminum Heatsink is a trusted solution that delivers on both performance and durability. Invest in this high-quality heatsink to ensure your equipment operates at optimal temperatures for extended periods.

Features:

Product Name: Aluminum Heatsink (heat sink extrusion)

Alloy: 6063

Dimensions: Various Sizes Available

Sample Leadtime: 15 Days

Sample: Available

Mounting Type: Vertical

Technical Parameters:

Durability	High
Alloy	6063
Surface Treatment	Anodized, Customized
Sample	Available
Compatibility	Universal
Dimensions	Various Sizes Available
Thermal Conductivity	High
Mounting Type	Vertical
Sample Leadtime	15 Days

Applications:

The Aluminum Heatsink product, originating from China, Guangdong, is a versatile solution designed for efficient heat dissipation in various applications. With its heat sink extrusion design, this product is ideal for use in scenarios where heat management is crucial, such as LED lighting systems, power electronics, computer components, and industrial machinery.

Thanks to its universal compatibility, this Aluminum Heatsink can be easily integrated into a wide range of devices and equipment. The availability of various sizes allows for flexibility in accommodating different requirements, ensuring optimal thermal performance. Whether you are looking to enhance the cooling system of your LED lights or improve the reliability of your electronic devices, this heatsink is a reliable choice. The vertical mounting type further adds to its versatility, enabling easy installation in different configurations. Packaged with a protective film, this product is delivered within 15-30 days, making it a convenient option for your heat dissipation needs. Payment terms include L/C and T/T, providing flexibility in the transaction process. Additionally, samples are available with a lead time of 15 days, allowing you to test the product before making a bulk purchase.
